

VASAVI DWIVEDI

Software Development Engineer | Full-Stack Developer

Lucknow, Uttar Pradesh | vasavidwivedi180@gmail.com | +91 8081785443 | github.com/vvasavii | linkedin.com/in/vasavi-dwivedi | vasavi-portfolio-beta.vercel.app

SUMMARY

Full-Stack Software Developer and 2026 Computer Science graduate with hands-on experience building web applications using React, Next.js, TypeScript, JavaScript, Node.js, Express.js, and PostgreSQL. Experienced in authentication, relational data modeling, and REST API design through full-stack projects and development internships. Solid DSA fundamentals, seeking entry-level Software Engineer / SDE / Full-Stack Developer roles; open to relocation and remote work.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Databases & ORM:** PostgreSQL, SQL, Prisma
- **Backend & Tools:** REST API Design, Authentication, Zod (schema validation), Git, GitHub, Postman, Vercel, Render

PROJECTS

Woven — Full-Stack Bookmark & Link Management Platform | [Live Demo](#) | [GitHub](#)

- Built Woven, a full-stack bookmark manager for organizing saved links into user-specific collections with favorites, attachments and search, using Next.js, TypeScript, Tailwind CSS, and PostgreSQL.
- Engineered a smart link-preview pipeline using Cheerio for server-side Open Graph metadata extraction, and added authenticated PDF/image attachments with Cloudinary storage, PostgreSQL metadata, previews, and relationship-aware deletion.
- Modeled a normalized relational schema in PostgreSQL with Prisma (users, bookmarks, collections, attachments) and built 20+ REST API endpoints, covering bookmarks, favorites, link previews, and file attachments, validated with Zod and secured end-to-end with Clerk authentication.

BloomIn — Small Business Digitiser | [Live Demo](#) | [GitHub](#)

- Built a full-stack storefront platform with Next.js, TypeScript, Node.js, Express.js, PostgreSQL, and Firebase Authentication that lets small, non-technical shopkeepers get online without hiring a developer.
- Designed end-to-end customer and seller workflows: product browsing, cart, checkout, order tracking, and a seller dashboard.
- Added QR-based storefront access and bilingual English/Hindi support, making storefronts more accessible for local businesses and their customers.

Pawsitive Pursuit — JavaScript Browser Game | [Live Demo](#) | [GitHub](#)

- Built and shipped a responsive JavaScript browser game with custom illustrations and smooth UI animations.
- Designed a branching game-logic engine with 6 distinct endings based on player choices, attempt count, and in-game events.

EXPERIENCE

Front-End Developer Intern — Hibiscustech Gr Pvt Ltd 07/2025 – 09/2025 | Remote

- Engineered browser-based multiplayer game prototypes in TypeScript, implementing bot and local-play modes across 3 game scenarios.
- Designed and implemented core game logic and animation systems, improving gameplay responsiveness, and reducing frame/render issues.
- Built and integrated the profile section, background image system, and Connect Four bot logic while implementing ongoing UI improvements and fixes across game interfaces within an Agile, sprint-based workflow.

Web Developer Intern — IBM PBEL 06/2025 – 07/2025 | Remote

- Developed a responsive frontend website using JavaScript, implementing assigned page layouts and UI requirements.
- Debugged and refined interactive UI elements, translating project requirements into a functional implementation, completing assigned deliverables within the internship timeline.

EDUCATION

Bachelor of Technology (B.Tech) CSE — Shri Ramswaroop Memorial University, Lucknow (CGPA-7.66/10) 2026

Senior Secondary (Class XII), ISC — St. Dominic Savio College, Lucknow 2022

CERTIFICATIONS & CREDENTIALS
